Illia Borshch

👤 Objectives

I am an ambitious and hardworking student in year 11 with a predicted Grade 9 GCSE in **Maths** and **Computer Science**.

I deeply want to step by step build a successful career in IT. For one year now I have been actively interested in **Python programming** using **Django framework**, **C++** *(preferable)*, **Algorithms and Data Structures**, and **problem-solving** on resources such as leetcode *(over 330 problems solved)*.

Strong skills in algorithms, maths, and logic. Problem-solving - create solutions for industry needs. Attention to detail and patience. Self-motivation and independence. Resilience and constant willingness to study are my main keys to success!

🎓 Education

Kyiv 221 Secondary School
September 2012 — June 2020

Polish & Ukrainian Maths Liceum
September 2020 — March 2022

Writhlington School
April 2022 — June 2023

✪ Courses

C++ language, stepik.com

Python language, stepik.com

Algorithms, coursera.org

SQL & PostgreSQL, stepik.com

Flask framework, stepik.com

Computer Graph Theory, stepik.com
